

Beautiful You Permanent Cosmetics Microneedling Post-Procedure Instructions

- 1.) Immediately following your Microneedling procedure, you can expect the needled areas to be red. This generally lasts for about 24 hours. By the day after the treatment, any areas of remaining minor redness can be concealed using a base concealer or foundation.
- 2.) The areas treated with the Microneedling process will get slightly flaky for about 3-4 days. The initial few days of redness will then turn to light pink as new skin grows and it will then continue to fade.
- 3.) To reduce and minimize healing period it is important to follow all post treatment instructions carefully.
 - Apply the ointment provided at your appointment as needed.
 - Keep the area dry for the rest of the day of your procedure. The next day you can resume your regular hygiene routine.
 - Avoid exposure to sun light at least 3 days after treatment.
 - Do not wear makeup until the day after your procedure.
 - Use sun block on the affected area after the first 24 hours.
 - Do not apply peeling or whitening products to the treated area for at least 3 weeks.
- 4.) Deep wrinkles, pitted scarring and scar relaxation can require up to 3 treatments scheduled up to several weeks through several months apart.
