

## **Beautiful You Permanent Cosmetics**

### **3D Sleek Eyebrow Aftercare Instructions**

The duration of your 3D Sleek Eyebrows depends on how they are being treated after placement. To prolong their life, it is important to follow these guidelines.

1. Please take extra care during the first 24 hours following treatment. This first 24-hours is how long it takes for the adhesive to set. It is normal to experience some brow loss during this time. Avoid getting your brows wet during this first 24 hours.
2. Do not pick, pull or rub your eyebrows.
3. Oily products will soften the bond and make your brows fall out sooner. Avoid these products near the eyebrow area.
4. After the first 24-hour period, water can touch the eyebrows, but make sure shampoo or conditioner does not run through them. Do not apply any oily products before showering. Avoid touching your brows while in the shower.
5. If your brow area feels itchy, just press gently and this will relieve the itch.
6. To wash brows, allow light water stream to run through them without rubbing them. Carefully pat with a towel afterward.
7. If you find an eyebrow has moved out of place, gently push it back into place like you would with your own eyebrows.
8. Be careful when putting clothes on over-head in order to not to pull the hairs with your clothing.
9. Eyebrow mascara or brow gel can be used to secure extensions into place when you find they are getting messier.
10. May participate in sauna and steam rooms but only 24 hours after treatment. Avoid touching your brows while in a sauna or steam.
11. If you no longer wish to have 3D Brows, you can make an appointment with your technician to remove them or use an oily based product to soften the bond and remove.
12. Most people will need a fill somewhere between two and four weeks.
13. Contact Beautiful You Permanent Cosmetics for questions or concerns.
